

Bureau of Labor Statistics Data by Industry

Industries at a Glance

Over 100 industry pages, displaying a "snapshot" of recent national data from several BLS surveys and programs. The data shown are based on the NAICS supersector, sector, and industry level.

Employment, Hours, and Earnings

BLS provides data on employment, hours, and earnings at national, state, and selected local levels. Similarly, BLS publishes annual and quarterly employment and wage data by industry for counties, as well as employment projections by industry.

Occupations

BLS provides national estimates of employment and wages by occupation for more than 700 occupations are available for many 3-, 4-, and 5-digit NAICS industry groups.

Safety and Health

BLS publishes annual data on illnesses and injuries sustained on the job, as well as a complete count of all worker fatalities. State and national data are available by industry for on-the-job injuries and illnesses and for workplace fatalities.

Producer Price Indexes

BLS publishes monthly data on changes in the selling prices received by domestic producers of goods and services. Price indexes are available for the output of many industries and about 10,000 specific products and product classes.

Import and Export Price Indexes

BLS provides monthly data on changes in the prices paid by U.S. businesses for imports and prices received by U.S. businesses for exports. Prices cover nearly all goods trade and air passenger and freight services trade at a national level and for detailed industry and product categories. Locality-specific import and export price indexes are also available.

Employment Costs

BLS publishes quarterly indexes measuring change overtime in labor costs (also called employment or compensation costs) and quarterly data measuring the level of costs per hour worked.

Productivity

BLS provides data on labor productivity, total factor productivity, and unit labor costs for the U.S. business sector, nonfarm business sector, manufacturing sector, and many individual industries. Quarterly and annual statistics are available for the sectors, while only annual statistics are available for individual industries.
